HIGHLIGHTS:

Year end profit taking wiped out early week higher bids in the grain and soybean trade this week. However, wheat had enough early week momentum that this commodity ended up higher. The top news stories of this year were improved demand for grain and soybeans that saw year end prices above a year ago despite the second consecutive year of a bumper corn and soybean crop and two back to back drastic hurricanes that wiped out the New Orleans export terminals for a few months. This resulted in a volatile market with substantial day to day and weekly price changes. Wheat made a long comeback from the low time after the hurricanes in September. Corn bids improved substantially but LDPs were the market for the most of the year and often ranging from 20-45 cents per bushel. World soybean stocks are at an all time record level but demand has improved enough to have year end prices above a year ago. High crude oil prices shot gasoline and diesel above 3.00 a gallon at the pumps in the US and spurred the construction of substantially more ethanol and bio-diesel plants. Export sales, especially soybeans, getting off to a slow start this crop year. No export announcements made this week. For the week: Wheat 3 to 9 cents higher. Corn steady to 3 cents lower. Sorghum 3 cents lower. Soybeans 14-15 cents lower.
